Understanding The Division of Time

*****The New Year will start somewhere between March 20th-23rd. Check the sundial to be certain; do not use online data.**

This is YHWH's 364 day Torah, Zadokite, Enochian Calendar as prescribed in the Book of Enoch, chapter 72. This calendar has 364 days, 12 months divided into 4 seasons (quarters), each consisting of 3 months. Each season (quarter) has two months with 30 days each and one month with 31 days, with a total of 91 days per quarter and 364 days across the complete year. Each month the sun rises and sets through 12 gates - 6 gates on the east for the rising and 6 gates on the west for setting. The year begins with the sun rising in the 4th Gate and proceeding through the Gates finishing in the 3rd Gate. Each day is divided into parts (hours) of light (day) and dark (night), for a total of 18 parts per day each part consisting of 80 minutes. There are 1440 minutes in each day, 18 equal parts each of 80 minutes ($18 \times 80 = 1440$ minutes). The 365 day year is measured in sidereal time. Sidereal time is a time scale that is based on Earth's rate of rotation measured relative to the fixed stars as opposed to solar time, which is based on the Sun's position in the sky. Each sidereal day supposedly has 24 hours however each day but is only 23 hours, 56 minutes and 4.1 seconds. A 'day' that is incomplete. Earth then supposedly has to move a short distance (about 1°) along its orbit around the Sun. So after a sidereal day has passed, Earth still needs to rotate slightly more before the Sun reaches local noon according to solar time. A mean solar day is, therefore, nearly 4 minutes longer than a sidereal day. Therefore, there is one fewer solar day per year than there are sidereal days. A year has 8736 hours or 524,160 minutes per year. A 365 day year of 23 hours, 56 minutes, and 4 seconds per day gives a year of 8736 hours or a total of 524,160 minutes per year. Likewise a 366 day year of 23 hours, 52 minutes, and 13 seconds per day gives a year of 8736 hours or a total of 524,160 minutes per year. Likewise a 364 day year of exactly 24 hours per day, gives a year of 8736 hours or a total of 524,160 minutes per year. The year will always have 8736 hours, whether it is a 364 Enoch Day year of exactly 24 hours per day, or a 365 Sidereal Day year of 23.93425 hours per day, or a 366 Leap Day year of 23.86885 hours per day, the duration of time does not change, but it is the allocation of time which has changed to create more days. A day is still a day but how we measure it is all wrong. Time has been distributed to show 365/366 days when it is 364 as YHWH prescribed in the book of Enoch. This calendar is for believers to reconcile this error and return to YHWH's appointed times.

***** Days are numbered from 1-364 as commanded. Roman dates are not used but you can pencil them in if needed. It now appears that though the Gregorian times are all in error, that the modern week is the same as the Torah week, with the Spring & Fall Equinoxes occurring always on Day 3-Tuesday, Aviv 1 New Years Day on Wednesday and the 7th day Shabbat on Saturdays. YHWH somehow has managed to preserve the Torah week so that Shabbat, based on the Enochian-Zadokite**

framework, would not be lost! All seasons also always start on Wednesday Day 4 of the week. We were quite surprised to make this discovery based on the reading of the sundial not the handed down traditions of the rabbis. These weekdays will never and can never change IF we stick to HIS Word and COMMAND to only count 364 solar days of 18 parts! Failure to do this will mess up the week, just like the rest of the Gregorian Calendar!

****** Yom=Day in Hebrew. A Torah Enochian Day = 18 parts or hours or one revolution of the earth on its axis.**

Torah commands that the Torah year can only have 364 days divisible by 7! Regardless of what man or religion or secularists think. We are called to follow Scriptures and obey whether we have or don't have all the answers. Here are key verses that warn us that by following man or a 365.25 day year we see that YHWH declares that our weekly Shabbats and all other appointed times will be off. He promises that to us, unless we obey Him and stick to the 364 day year, despite what is going on around us! That's if we truly desire His Shabbats!

Here are the clear commands! Jubilees 6:30-38, Enoch 72: 6-7, 31-33, Enoch 75:2-4, Enoch 82:6-7. Two key points are in order. The word EXACT OR EXACTLY OR EXACTLY IN ORDER from year to year until eternity starts, appear in every one of the 364 day year references. That can only mean that YHWH sees our understanding and obedience to 364 days and 52 weeks in a year only as our recognition that He, not science so called, is the Adon-Master over the believer's life. It is a requirement to keep things in exact order and any departure of even one day, between now and eternity will cause a disaster in reckoning time. Adding a day to 364 will cause us to miss the wonderful set times. Let us be sincere but sincerely right, as we can be given the blessings of His Word and mind!

We cannot worry about the Roman dates that change due to the Gregorian calendar and their sidereal days. We suggest counting the 364 days out from Aviv 1 each year to be exact, marking each New Month and avoiding Roman dates. With this "day by day" count, Israel can finally learn how to determine time, YHWH's perpetual time on their own. The command to count only 364 days a year is not a suggestion but a command-mitzvah from YHWH our Abba, regardless of what other "intellectuals" do, say or think!
